Customer Release Notes

eRAD PACS
Version 8.0
Viewer Build 61

Release Date May 20, 2021

Table of Contents

Resolved Issues

1. **Viewer crash when a close command is called while creating the Patient Folder panel**

   If the web viewer receives a command to close the session while it is still initializing the patient folder panel, it might crash. This has been resolved.

2. **Viewer crashed when the report was processed after the close**

   If a report is received after the viewer starts terminating the session, the viewer might crash. This has been resolved.

3. **Viewer crash when show Patient Folder command was not finished**

   If a second web control request to open the patient folder panel is issued before the first completes, the viewer could crash. This has been resolved.
