New Features

This release introduces the following features and enhancements:

Category	Redmine #	Subject	Description
Payment Control	35614	Display visit cost overrides on Universal Receipt	This enhancement to Payment Control updates the payment calculations to consider visit cost overrides when a combined payment is made.

SORTED BY CATEGORY AND REDMINE

Refer to the FEATURE DETAILS section below for configuration and usage information.

Resolved Issues

This release resolves the following issues:

Category	Redmine #	Subject
Payment Control	35619	Resolved Payment Control issue where voiding payments on separate orders would cause receipt errors to display.
Payment Control	35638	Resolved Payment Control issue where Preapproved Payment details were being omitted from receipts on voided transactions.

SORTED BY CATEGORY AND REDMINE

FEATURE DETAILS

Payment Control

Feature #35614 – Display visit cost overrides on Universal Receipt

Summary

This enhancement to Payment Control updates payment calculations to consider visit cost overrides when a combined payment is made.

Previously, there was no way of knowing the actual visit cost at the time the receipt was generated which would cause inaccurate calculation of the amount the insurance owes.

There are no user-facing changes in the RIS Client, but custom receipt forms will display separate values.

Configuration Instructions

No System Administrator actions are necessary to enable this feature.
