 _ReleaseNotes	07/25/18 10:38 AM
 DB	07/24/18 2:48 PM
 ThickClient	07/24/18 2:47 PM
 Build_2017.6.11.7z	07/25/18 10:41 AM

**INTENDED AUDIENCE**

The intended audience for this document is the RadNet Clinical Systems team and the eRAD Support/Service team.

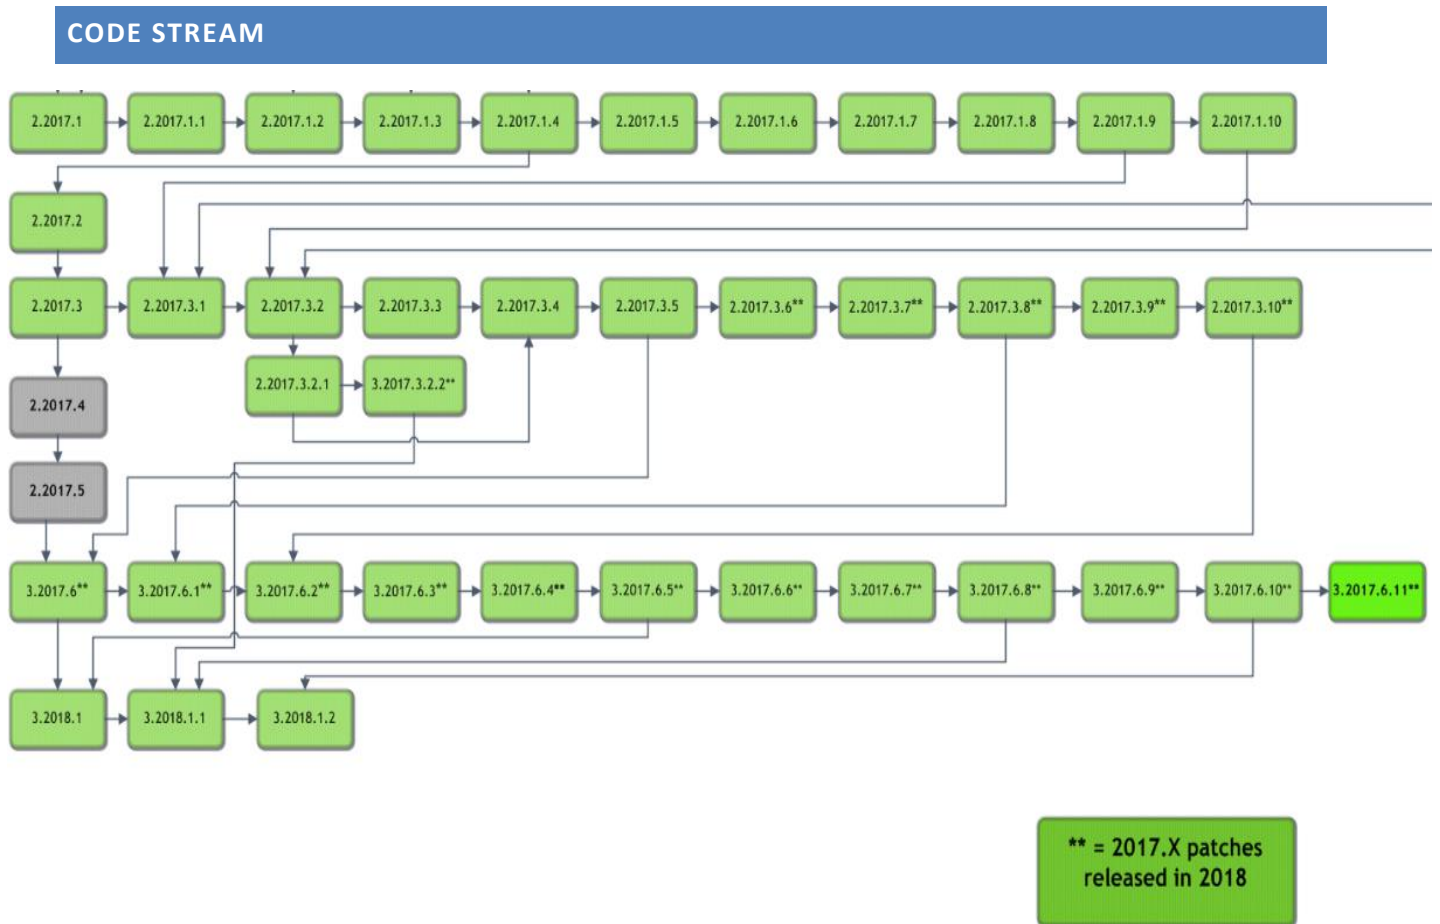

It is appropriate to share the document with any customers applying the patch, in order to review new feature descriptions and resolved defects.

**WHO IS AFFECTED**

Build 2017.6 installs. This server update must be applied to 2017.6.10.

## RESOLVED ITEMS

Redmine # for 2017.6.11	Subject
21718	<p>A correction has been made to the Amount to Collect calculation when a Billing Code is configured as "Allow Amount to Collect with Valid Insurance" equals N (No). If an order is a Self Pay, this setting is ignored and the appropriate Self Pay amount will return as normal. If an order is <b>not</b> a Self Pay and there are multiple Billing Codes, the Amount to Collect will only be \$0 if <b>all</b> Billing Codes are set to "Allow Amount to Collect with Valid Insurance" equals N. Otherwise, any Billing Codes with that setting will be ignored for the Amount to Collect calculation and the amount will be determined based on the Billing Codes that are set to Y (Yes). This behavior follows the intention of this setting, which allows certain Billing Codes to be ignored when calculating the patient's financial responsibility for studies that are submitted to an insurance. The setting is not relevant for Self Pay studies.</p>

**Legend:**

Light Green = Previously Released software

Gray = Internal version, non-release version

Bright Green = Current Release

## ERAD RIS RELEASE VERSION NUMBERS

Build	Patch	UI Version	Core Version	WS Version	DB Version	Digital Forms	Patient Portal	UM Portal	Provider Portal	Notes

## INSTALLING

### CLIENT/GUI

Copy and replace the current rRIS...zip file with the eRAD\_rRIS\_2017.6.11.zip file provided with this release.

Be sure to make a backup of the ris.exe.config file contained within the current .zip folder.

### DATABASE UPDATES

Always run the upgrade scripts in a test environment of the actual database to make sure they run cleanly. If any errors occur please contact development.

*Note: There is a new upgrade process introduced with B43.1 called "RunUpgrade.bat". The batch file will open a command window. This process will prompt you for the database server name, database name and authentication credentials. There is no need to run the database upgrade scripts manually as was done in previous releases.*

- 1) From the upgrade folder, double click the "RunUpgrade.bat" command file.
- 2) Enter the server name, database name and authentication credentials to the database. You have 2 choices for authentication credentials.
- 3) You can choose to use "Trusted connection". Using this option will pass the identity of the currently logged on user. If this user has "db\_owner" access to the eRAD RIS database then feel free to use this options.
- 4) If you decide not to use "Trusted connection" then you will be prompted for user id and password.

Example:

```
C:\Windows\system32\cmd.exe
Enter database server name/ip: my_eRAD_RIS_server
Enter database name: my_RISDB
Use trusted connection? [Y,N]?N
Enter user name: terry
Enter Password: *****

This script will upgrade your database.
Please ensure that you have read all instructions.
Please ensure that you have taken all necessary precautions.
Do you want to continue? [Y,N]?
```

After the upgrade program has finished you can find the upgrade logs in the “log” folder. The file name will be eRAD\_RIS\_db\_upgrade\_timestamp.log, where timestamp is a value representing the date and time the upgrade started. If you see any errors please contact the development team
