SUMMARY

Intended Audience

The intended audience for this CUSTOMER RELEASE NOTES document is the RIS Administration team for all eRAD RIS customers.

This document describes the purpose, configuration, and operation of new features made available with this release, identifies issues resolved in the release, and highlights any unresolved known limitations.

This information should be used by all customers to determine how these changes affect their organization's workflow, and to plan their organization's upgrade strategy for eRAD RIS.

> *There is no separate* SERVICE RELEASE NOTES *edition of this document.*

Who Is Affected

This hotfix release of ERAD RIS V3.2018.3.4 includes a single feature enhancement and one resolved issue.

This version contains new features and bug fixes that are recommended to be applied on ERAD RIS V3.2018.3.3 installations.

NEW FEATURES

Scheduling

Feature #26293 – Ability to directly edit or remove a closure from the Appointment Book

Summary

This enhancement to Scheduling adds the ability to edit or remove a closure or restriction directly from the Appointment Book.

Previously, in version 18.3.2 (#25391) we added the ability to create a closure (or restriction) directly from the Appointment Book.

With this change users can also remove a closure when no longer needed.

Users with Full access to `Config.AppointmentBook.ModalityClosure` will now see `Edit Closure` (or `Edit Restriction`) and `Remove Closure` (or `Remove Restriction`) context menus when right-clicking on an already closed or restricted timeslot in the Appointment Book.

RESOLVED ISSUES AND KNOWN LIMITATIONS

Resolved Issues

This release resolves the following issues:

Redmine #	Subject
26293	Resolved Scheduling issue where Appointment Search results were off by one minute.

New Known Limitations

No new known limitations were identified with this release.
