Revision	Author	Description
February 14, 2023	Kevin Brooks / Hilary Saltmarsh	▪ Commercial release.

SUMMARY

This CUSTOMER & SERVICE RELEASE NOTES document describes the purpose, configuration, and operation of new features made available with this release, identifies issues resolved in the release, and highlights any unresolved known limitations.

⚠️ *Please carefully review these release notes even if your system will not be upgraded immediately, to identify and communicate any issues that may affect your organization.*

Intended Audience

The intended audience for this document is the RIS Administration team for all eRAD RIS customers.

The intent of this document is to describe the content of the build or hotfix with sufficient detail for a Customer to be able to understand the features, and for the Customer's RIS Administrator to be able to perform routine configuration of features.

This information should be used by all customers to determine how these changes affect their organization's workflow, and to pla   n their organization's upgrade strategy for eRAD RIS.

ℹ️ *There is no separate SERVICE RELEASE NOTES edition of this document.*

Release Content

This release of ERAD RIS 4.2023.003 includes a Patient Portal feature enhancement to better display availability in timeslot search results.

Who Is Affected

This version is recommended to be applied on ERAD RIS V4.2023.002 installations.

No part of this material may be published, reproduced, stored in a retrieval system, or transmitted in any form or by any means without the prior written permission of eRAD.

NEW SETTINGS

No settings were added or updated with this release.

NEW FEATURES

Patient Portal

Feature #32924 – Enhanced timeslot search results to better display availability

Summary

This enhancement to the Patient Portal provides an improved experience while searching for possible timeslots at different locations during the scheduling process by ensuring sites with no availability are distinctly displayed in the results list.

Background

Previously, searching for available timeslots in the Patient Portal was sometimes cumbersome as the default location (location patient was most recently seen or location that is closest to the patient's address) would be pre-selected by default, even if that location did not have availability. This was causing patients to page through multiple unavailable days if they did not realize that they can choose from other sites on the left that DO have openings in the displayed time frame.

Feature Description

With this change, the first available timeslot will return regardless of the defaulted parameters.

With the `Earliest Availability` option selected, locations with no availability on the desired date will return at the bottom of the list in a different font along with the next available date and time in red. If the patient chooses one of those locations at the bottom of the list, the selection will move to that date and time.

With the `Distance From` option selected, the first available timeslot at the location that is closest to the patient's address will return first. Options will display from shortest distance to farthest distance regardless of availability. However, if the location does not have the time or date relative to what is desired each location will be noted in red with either the first available timeslot or the next available timeslot.

Note, if the patient manually advances to another date the locations will redisplay using the same first/next availability logic as above.

Configuration Instructions

No System Administrator actions are necessary to enable this feature.

RESOLVED ISSUES AND KNOWN LIMITATIONS

Resolved Issues

No additional issues were resolved with this release.

New Known Limitations

No new known limitations were identified with this release.

VERSION DETAILS

Package Contents

The release package includes the following folders:

04-20-2012 8:51 AM	@Hotfixes
02-14-2023 2:08 PM	_Documentation
02-14-2023 3:47 PM	_ReleaseNotes
02-14-2023 2:05 PM	Client Application
02-14-2023 2:05 PM	DB
02-14-2023 2:05 PM	External WebAPI
02-14-2023 2:05 PM	Identity Service
