SUMMARY

Release Announcement

This release of ERAD RIS 4.2024.092 resolves an Inbound Document filter clearing issue and a Patient Portal scheduling issue.

Resolved Issues

This release resolves the following issues:

Category	Redmine #	Subject
Inbound Document	35533	Resolved Patient WF: Make Appointment issues with worklists, including problems with "Reset Layout", an issue where user-level site filters were not cleared by the "Clear all filters" button, and issues where rows were not appearing as expected.
Patient WF: Make Appointment	34988	Resolved Patient WF: Make Appointment issue where required questions were erroneously removed from the scheduling process causing appointments to be created without required information.
