FEATURE DETAILS

## Feature #35739 – Support Digital Forms Required Fields Attribute for Guided Workflow

Summary

This enhancement to Guided Workflow for Mammography adds support for required fields on Digital Formsby introducing an attribute to properly enforce required questions during the workflow.

Background

Previously, in Guided Workflow, digital form validation did not account for UI actions or workflow status. This caused all form questions to be required immediately, rather than only at the intended step (e.g., Check-In), which led to questions appearing too early in the process.

Feature Description

The Digital Form Editor now includes a `Guided Workflow Required` checkbox. Checking this box ensures the form will be required during Guided Workflow.

Configuration Instructions

No System Administrator actions are necessary to enable this feature.
